

Documentation and useful resources for SAP BusinessObjects Business Intelligence Platform

Product Documentation:

The documentation of the SAP BusinessObjects Business Intelligence platform is published in SAP Help Portal

For more information, see: <http://help.sap.com/bobip>

Product Availability Matrix (PAM):

Product Availability Matrix contains information about SAP software releases:

- Release type (for example: standard release, early adoption release, or custom development project release)
- Planned availability
- Maintenance durations
- Upgrade paths
- Platform availability, including database platforms and operating systems
- Compatibility with third party platforms (for example: database, web application, operation systems)

For more information, see: <http://support.sap.com/pam>

BI eLearning Tutorials:

The product tutorials are designed to help you learn how to use SAP BusinessObjects Business Intelligence (BI) products.

For more information, see: <http://sap.com/learnbi> or <http://scn.sap.com/docs/DOC-7725>

SAP BusinessObjects Pattern Books:

Deploying SAP BusinessObjects Business Intelligence (BI) platform can involve more than just installing BI platform software on a single machine. To fully leverage SAP BI platform in your company's environment, you may want to complete the following tasks:

- Set up firewalls, reverse proxy servers, and load balancers
- Configure your company's existing software, such as application servers and database servers

- Install and configure BI platform software on multiple machines for scalability and redundancy
- Integrate with your company's existing security infrastructure

The Pattern Books provides step by step instructions on different deployment scenarios of SAP Business Intelligence Platform.

For more information, see:

<http://wiki.scn.sap.com/wiki/display/BOBJ/SAP+Business+Intelligence+Platform+Pattern+Books>

Adaptive Processing Servers Best Practices:

Adaptive process servers summarizes the following:

- Best practices, tuning, configuration and troubleshooting to make your SAP BusinessObjects Adaptive Processing Server perform best.
- A handy summary for an administrator familiar with SAP BusinessObjects Enterprise BI platform.

For more information, see: <http://scn.sap.com/docs/DOC-31711>

Business Intelligence Sizing Guide:

Properly deploying your SAP BusinessObjects BI4 or SAP Lumira landscape is critical. It is necessary to properly size and deploy the SAP BusinessObjects products.

For more information, see: <http://sap.com/bisizing> or <http://scn.sap.com/docs/DOC-33183>

Business Intelligence Upgrade Resources:

To upgrade your Business Intelligence, planning is an important aspect to ensure smooth process, mitigate risk, and provide more capabilities and value.

For more information, see: www.sapbi.com/upgrade
